

HADLEIGH JUNIOR SCHOOL NETCOM CLEVERTOUCH SOLUTION

Netcom92 Clevertouch solutions Hadleigh Junior School case study

Before

The requirement:

In May 2014 Hadleigh Junior School received a call from our internal sales team. Where they found out that Hadleigh Junior School was looking for 13 x 65" Clevertouch screen to be installed during the 6 weeks holidays.

Hadleigh Junior was looking to put Clevertouch into every classroom. So they have purchased 13 x 65" plus Clevertouch screens to replace all Smartboard.

To show the school what they could do with the Clevertouch Kay organised a demo with Sahara at the school. The Clevertouch went into every classroom, where a teachers AV contention plant was put on the wall so that any teacher could take their laptops or computers into and just connect to it. Also we have to make sure it was safe for all the pupils working in there.

Hadleigh Junior School was looking for a company who could take care of the entire project including product supply, installation, design and data/electrical cabling.

The full requirements were:

- 13 x 65" Plus Clevertouch Screen
- 13 x Clevertouch height adjustable wall mounts
- 13 x Teacher's AV connection plate

Clevertouch Screen:

Hadleigh Junior School required a new touchscreen for all their classrooms. The school required that any teacher that went into the rooms to teach could connect to the screen and start teaching.

Netcom understand that the students need easy access to the screen. With this in mind we mounted the Clevertouch screens to a height adjustable wall mount.

Netcom provided the school with a 65" Plus Clevertouch screen and a Clevertouch heavy duty height adjustable wall mount.

After

Data and Electrical cabling:

Due to the Clevertouch Plus screen having android the school required a hard wire data point in each room along with the electrical point for the screen and wall mount.
